

Description

The corner protectors are a protection system made from high-density wood fibers without added resins. Their protection of the top box and sides (forming columns), along with their versatility in placement, make them the fastest, simplest, and most economical packaging solution, suitable for all industrial sectors.

They are ideal for closing, packing, and also palletizing goods. They increase stacking capacity and have high resistance to humidity and cold storage rooms. Thanks to their composition without adhesives or formaldehyde, they reduce the use of plastic film, generating savings and sustainability, making them the safest protection for food and highly recommended for export packaging.

Specifications

Property	Measurement (mm)
Flap width* (a,b)	40x40 - 50x50 60x60 - 70x70 75x75 - 100x100 150x150
Thickness (c)	2,5 / 3,0
Length (d)	From 100 to 2,750

(*) Special sizes up to 500mm, upon request.
Option to personalize (black only).
Available only in raw/natural.
